

The National Innovation-Fund Program

Win Over One Million Dollars Per Applicant

Do you have an amazing, working, energy or transportation technology?

Are you running into road-blocks or support-resource issues getting it to volume production?

General Rules:

- You must provide one working prototype for 30 days, or less, of merit testing.
- Your technology must have previously been rejected by an organized business group who has previously funded other products in the energy and transportation market.
- You must provide a volume manufacturing plan which uses existing factory suppliers.
- Winners must assign all rights to the public/private **National Innovation-Fund Program sponsor group** who underwrites their project.
- In addition to the One Million dollar acceptance award, winners receive 15% of the first Ten Million dollars of net profits.
